

Meech Test Kit

Models 983v2 & 984v2

The Meech 983v2 & 984v2 test kit gives operators & maintenance staff the ability to diagnose static related issues and monitor the performance of their ionising equipment. The model 983v2 Static Locator features a large LCD display for clear reading of static voltages. Please see the 983v2 datasheet for more information.

The model 984v2 is a true ion detector for both AC and pulsed DC ionisers. LED's show the presence, or not, of ions. Decreased detection range indicates the need to clean ionisers. Please see the 984v2 datasheet for more information

Test Kit/01/EN/-11/09

Technical Characteristics

Dimensions (H x W x D)	200mm x 235mm x 55mm
Weight	715g
Battery	Both units operate from 2 x AA Alkaline Batteries

Feature

Benefit

All in one test kit	Full test kit, as used by Meech engineers in one carry case
Calibration certificate & instructions	983v2 calibration certificate & full instructions for both units supplied inside the case

Product shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
