

General Cooling

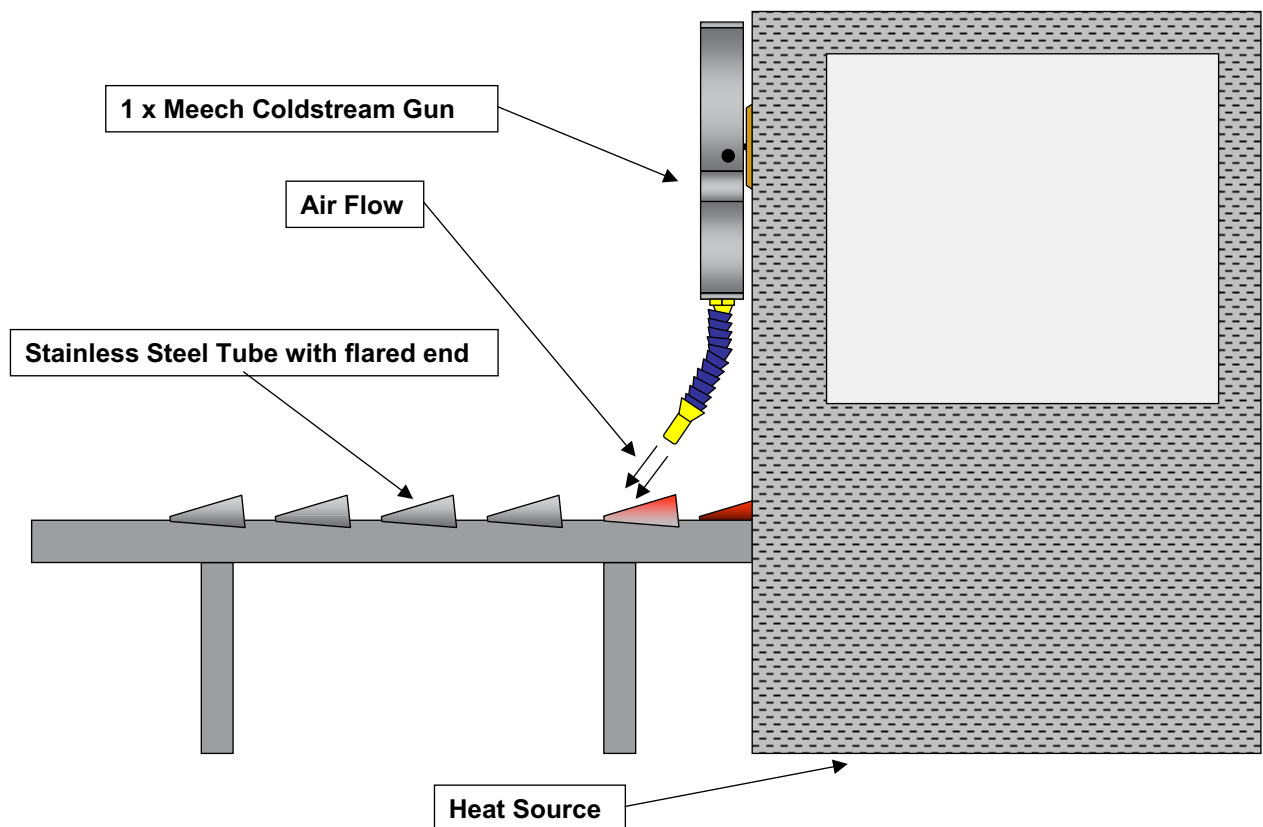

Coldstream Air Gun

MAT - Coldstream Air Gun - General
Cooling - ISSUE 1/EN-01/10

Application/ Problem

Coldstream Air Guns can be used to rapidly cool components. The size and simple magnetic base makes installation very easy.

Example/Solution

A scientific instrument manufacturer is assembling a stainless steel tube and plastic parts. The tube end is flared using heat; the flared end must be cooled quickly to avoid melting the plastic parts. A Coldstream Gun has provided the solution.

Products shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
