

Product Cleaning/ Swarf Removal

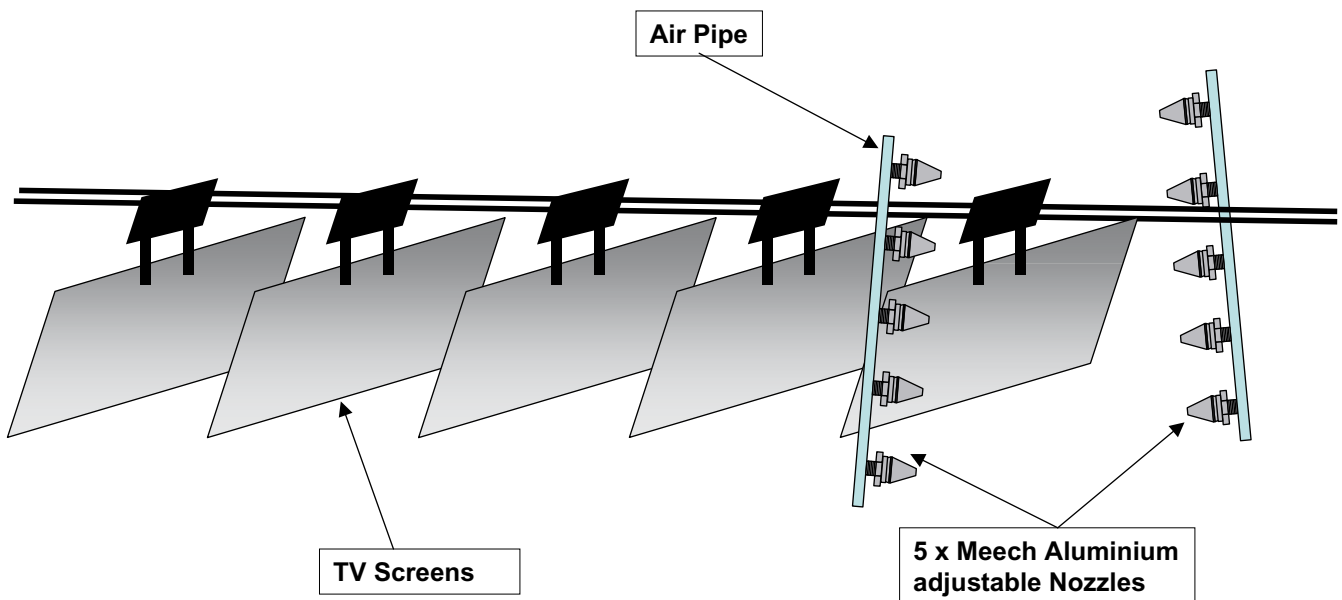

Energy Saving Safety Nozzle & Blow Gun

MAT - Energy Saving Safety Nozzle
& Blow Gun - Product Cleaning/
Swarf Removal - ISSUE 1/EN-01/10

Application/ Problem

The 25:1 air amplification makes Meech Air Nozzles perfect for blow cleaning items.

Example/Solution

A company producing glass for televisions needs to blow clean the screens before they are mounted onto units. Meech Air Nozzles can be connected in a row. This allows the air to flow at an angle, which then blows the glass completely free of contaminants. The air amplification also significantly lowers the running costs of the compressed air.

Products shown in this document may be covered by one or more patents, patents applied for and/or registered designs and/or trade marks. For further information please refer to our Head Office or visit www.meech.com.
